

Onapsis cybersecurity gains scalability with a six-week migration to the AWS cloud

Company Summary

Onapsis provides cybersecurity and compliance solutions for cloud and on-premises enterprise resource planning (ERP) and business-critical applications. Onapsis cybersecurity solutions automate the monitoring and protection of SAP and Oracle applications, keeping them compliant and safe from insider and outsider threats.

Its solutions include the Onapsis Security Platform, an SAP-certified cybersecurity solution. Unlike generic security products, Onapsis' context-aware solutions deliver both preventative vulnerability and compliance controls, as well as real-time detection and incident response capabilities to reduce risks affecting critical business processes and data.

THE CHALLENGE Seeking a speedy digital transformation to the cloud

Onapsis was seeking an ambitiously fast migration. The company had acquired a company with a datacenter in Germany, and an upcoming contract expiration accelerated the need to migrate workloads from their on-premises data center to one in the cloud. The timeframe was tight, at eight weeks maximum.

With 146 virtual desktops and integrations, Onapsis did not have the internal resources available for the operational purpose in the stipulated time frame.

Onapsis sought out an AWS Premier Consulting Partner to help with its accelerated digital transformation and found CloudHesive.

THE SOLUTION Achieving a smooth cloud migration in under six weeks

The CloudHesive team planned and deployed a comprehensive digital transformation strategy focused on business continuity, disaster recovery, continuous backup, and live migration. With the tight time frame, CloudHesive's analysis focused on dependencies and incorporated test migrations as well as a rollback plan.

CloudHesive deployed Amazon CloudEndure for backup and recovery, Amazon Route 53 for routing, Amazon EC2 for computing, and Amazon Virtual Private Cloud (Amazon VPC) to migrate and host Onapsis' 146 virtual machines from Germany to the AWS cloud in less than six weeks.

THE BENEFITS Seamlessly migrating to the AWS cloud in just six weeks

In under six weeks, CloudHesive migrated Onapsis completely off its legacy infrastructure within the six-week timeline and on to the AWS cloud with no rollbacks. Onapsis's infrastructure is now 100% in the cloud, offering reliability and scalability to Onapsis.

Services that Drive Success

DEVOPS

- Deployment of CloudEndure for backup and recovery
- Deployment of Amazon VPC to host virtual desktops
- Deployment of Amazon Route 53 for routing
- Built deployment scripts for environment deployment

Customer benefit summary

- Seamless migration on time with no rollbacks
- Increased scalability and cost efficiency

AWS Technologies used

- Amazon CloudEndure
- Amazon Route 53
- Amazon EC2
- Amazon Virtual Private Cloud
