

AWS Migration Consulting Services

Company Summary

Founded in June 2006 by visionary psychiatrists, Redgesam focuses on mental health care under the GES law. With 15+ years of experience, it is the main national network in this field, present from Arica to Punta Arenas. In collaboration with all the open isapres, it stands out for its ethics, high quality standards and efficiency for the benefit of more than 20 thousand patients per month, becoming an outstanding model in Managed Mental Health.

INDUSTRY

→ Healthcare and life sciences

SEGMENT

→ Private

REGION

→ LATAM

THE CHALLENGE Focus our efforts on prioritizing the migration of the customer's servers from their on-premise infrastructure to an AWS solution, ensuring a seamless transition in their services.

THE SOLUTION CloudHesive, performed the migration to an AWS infrastructure, and the following tasks were executed: Assembly of the Multi-Account Infrastructure, DNS Routing, installation and configuration of VPN, ACM, instance configurations, backups, Control Tower configuration and installation, log archive, security toling, EC2, public and private RTB, NAT GW, internet GW, Open VPN secreta manager and VPC implementation

THE RESULTS The migration to AWS infrastructure was done with the customer's specific needs in mind and following the 6 pillars of the AWS Well-Structured Architecture Framework. This transition was executed transparently, without impacting the client's operations.

Infrastructure Diagram

The migration to an AWS infrastructure and the necessary configurations for the expected operation of the solution were carried out.
